Certified project managers are in high demand across many endeavors and disciplines including health care, information technology, manufacturing, and the professional services sector. Organizations value effective project managers for their ability to integrate the best practices of project management with enterprise-wide initiatives in areas such as innovation, operations improvement, new product development, and transformational change. The Certificate Program in Project Management is designed for individuals who want to master the skills needed to lead projects and project teams.

The program benefits:

- Effectively define project requirements and write a project charter
- Employ a proven process for identifying and managing project stakeholders
- Organize the project work breakdown structure and network design
- Determine activity durations, the critical path, and project schedule
- Strategically balance project duration, cost, and scope objectives
- Monitor and control the project plans risk, budget, and schedule
- Develop the unique leadership skills required to lead a project team

The program faculty director:

RICHARD DEANE, PH.D., PMP, PE

Professor Emeritus in the Department of Managerial Sciences at the Robinson College of Business specializing in the practical application of project management principles. Richard consults for organizations such as the Centers for Disease Control and Prevention, Acuity Brands, General Electric, and the Boys and Girls Clubs of America. He is a registered professional engineer and a certified Project Management Professional. Dr. Deane has won numerous teaching awards during his career.

The reverse side of this brochure provides daily agendas and registration details.
